ning of each regular issue of the PCT Gazette.

(54) Title: ANTI-DAMAGE CONTACT LENS CASE

(57) Abstract: An Anti-Damage Contact Lens Case fashioned in special polymer with a base (6) of polyethylene and polypropylene, created for the perfect and safe storage and accommodation of contact lenses of diverse types and applications. The container as conceived shows itself to be perfectly safe for the protection of lenses of diverse types and applications, impeding the occurrence of tears or breaks resulting from the act of closing the container.
